

MONEY MATTERS

Take control of your business with an integrated accounting system and run your business more efficiently from core ledger to credit control. Our accounting software provides everything that you need to go forward with your business.

WAVE BOOKS, the accounting software is made by the expert team of Roopokar kipping mind the necessity of different businesses. We have built every necessary tool to do your accounting more easily and efficiently. In our WAVE BOOKS accounting software, you will find interactive and organized sales, purchase, inventory, manufacturing, banking, ledger, and other tools. With WAVE BOOKS, you will be able to do all accounting with full accuracy.

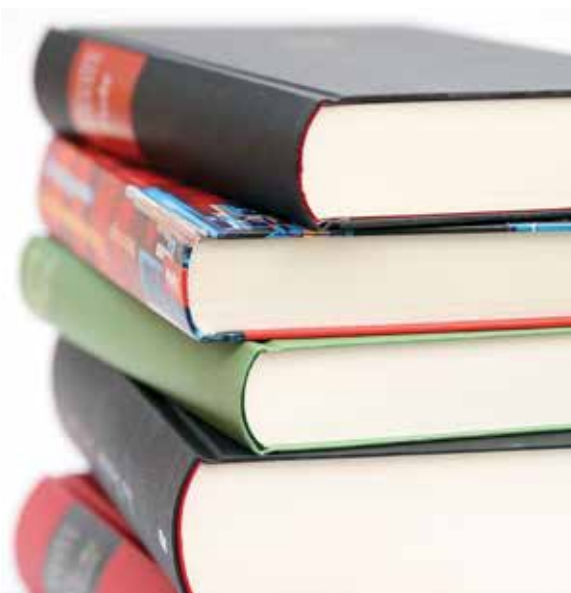

Sales

Forget remembering the book name where you entered a sale's report in historical time. Our WAVE BOOKS can do that time-consuming task without losing your precious time. WAVE BOOKS can keep all your sales records and documents. It can deliver you the data and reports whenever you require them and can also give you the freedom of printing.

Purchase

Now you will not be confused among different purchase records. Our WAVE BOOKS can make your job easy by providing you the right information you are searching for. You can see the purchase record for the different time and entity by using the search feature.

Book Closing

WAVE BOOKS can help you when you are under pressure to close your book and complete financial reporting faster. Its inbuilt intelligence can find out where your accounting is in the closing process. So you can do the work quickly.

Payments

WAVE BOOKS centralizes the payable and the receivable accounts that you can easily check all the payments in a single place. It will reduce the overall time spent on the payment process and will increase operational efficiency.

Budget

Budget feature gives you the power of budget analyzation. So you can allocate your budget more accurately depending on the analysis rather than the instinct.

Banking

Using the Banking feature of WAVE BOOKS, you can control all banking from a single place. It gives you the option to transfer your accounts and gives the ability to see account inquiries when you like.

Revenue

You can see your present revenue with just a click and leave the task to the intelligent to calculate revenue predictions. WAVE BOOKS software intelligence will do the job for you and will project predicted revenue for your better understanding of company growth.

Tax

WAVE BOOKS has features to calculate taxes for your company and the employee based on government tax policies. Tax and Vat rules can be made separately and assigned to any type of costing.

Profit and Loss Calculation

The software gives you the flexibility to know your profit or loss on standard Profit and Loss Statement format. It can do the math for you when you prefer. So you need not wait to see the current condition of your company.

Pricing:

The complexity of Accounting software increases with the size of the company and features. Paying capability increases when a company has more transactions. Thus, we have priced our software based on the size of the company. We have different packages for companies of small medium & large size. The main feature of our software is its customization capability. Upon customization, the price may vary and there will be chances for negotiation under special circumstances. To get a quote, please go to the Accounting Software page and fill the form..

Training:

There are few parts of the software like self-services, maintenance, and off the shelf customization. For which it is unnecessary to call Roopokar, rather the software has the inbuilt facility to perform those little tweaks. Small training will suffice to administer and maintain the software at the client end. Roopokar will provide the training for two days at client premises and one week remotely from Roopokar Office.

Deployment:

Deployment of WAVE BOOKS can be done both on the cloud and on-premises. Google Cloud, AWS, Digital Ocean and anywhere you name us, we will deploy the software there. And Roopokar will take care of all technical aspects and will provide you the software ready to operate.
